Interior Design App

https://github.com/tptorres/Capstone-Project-2020

Nicholas Samaroo's work:

'/' denotes looked into but not thoroughly

Work from last week:

[x] Completed the NID page and got started on the remaining pages

[x] Worked with Tyler on defining our MVP

[x] Successfully merged our code and worked out merge conflicts

Added mid-week: N/A

For this week:

[] Look into React Navigation and its relation with backend routes. Additionally

look into the backend calls that need to be made on the front-end

[] Finish the other pages; including, the ID page, intermediate login page which will capture the information returned from Google authentication, and interaction area which is where the ID's and NID's will connect

[] Work with Tyler to unify front-end and back-end code for deployment and

prepare for the MVP demo next week

Tyler's work:

Work from last week:

[x] Edited routes pertaining to portfolios/profiles, need to go over how we want to represent the data in the backend

[x] Cleaned up User model and added roles, allowing for the choice of User/Designer

[x] Merged api and client side repositories together

Added mid-week: N/A

For this week:

[] Get ready for MVP demo by creating script

[] Sync with Nicholas on how to split up demo

[] Finish backend work allowing for a designer to upload images to their portfolio and persist that data in the backend
